SUMMARY

As an expert frontend developer with +2 years of experience in Information Technologies, with strong creative thinking skills, high energy and integrity, skilled in developing complex solutions, and interested in writing new code;

- Ability to create effective algorithms, interact positively, and communicate appropriately with team members,
- Ability to grasp new technologies and concepts quickly to develop innovative and creative solutions to problems,
- A team player who is willing to take initiative and take leadership roles,
- Passionate about interacting with team members not only to work collaboratively, but also to learn, share experience and opportunities for improvement,
- Always willing to learn about various technologies, tools and libraries,
- Comprehensive knowledge of HTML, CSS, JavaScript, React, PostgreSQL, Django.

WORK EXPERIENCE

Clarusway LLC, US(Remote)

Jan 2022 - Present

Front End Developer / Mentor

- Developed interactive, responsive and scalable frontend using HTML5, CSS3, JavaScript ES6, React,
- Designing a website with HTML, CSS, SASS(SCSS) and Bootstrap-5 codes,
- Support HTML and CSS projects using JS Dom manipulation and event listeners,
- Developing the payment page of the e-commerce website with JS functions using DOM, iterator, callback functions, string array functions and events,
- Requesting apis using Async, Await and Fetch structures to view data from various platforms,
- Enabling customers to make transactions on their websites using json, local storage, and array methods,
- Using state hook and component structures in various projects
- Working with React-router, bootstrap and axios libraries for user-friendly preparation of prepared websites,
- Combined Material UI and to achieve better UI experience,
- State management applied using React States and Redux,

- Built a Dashboard page showing data related to users integrated with Database,
- Experienced in writing modular and reusable codes, using build tools and package managers,
- Studied on Computational Thinking, Operating Systems, Linux, Version Control Systems(Git & Github), Software Development Life Cycle (SDLC),
- Used SCRUM & Agile methodologies and JIRA while working on individual & group projects.

Izmir / Turkey (Ministry Of Defence) / Educational Leader

Apr 2020 - Sep 2021

Afghanistan Base (NSPA / NATO) / Project Advisor

Agu 2019 - Apr 2020

Turkey (Turkish Armed Forces) / Officer(Lieutenant)

Agu 2015 - Agu 2019

TECHNICAL SKILLS

HTML5 | CSS3 | JavaScript | React.js | Redux | SASS | Bootstrap | Material.UI | Axios | Yup | Python | Linux | SQL | PostgreSQL | Git | GitHub | APIs | Agile | Jira | SDLC | OOP | RESTful APIs.

SOFT SKILLS

Analytical Thinking | Problem-Solving Abilities | Self-Motivated | Strong Communication | Project Management | Planning | Time Management | Adaptability | Continuous Learning | Collaboration & Teamwork | Coaching Mindset | Resilience | Curiosity | Emotional Intelligence | Creativity. | Leadership | Discipline

PROJECTS

- **FireBlogApp** : The project, which was created using Firebase Auth for authentication and Firebase Realtime Database for CRUD operations, was completed with teamwork. A blog site has been created and the authorizations to operate within the blog have been restricted or increased according to the user's authorizations. Skills/Tools : Firebase realtime-database library, Material-ui library, React-router library, React-toastify library, Firebase-authorization.
- **Movie App**: It is a react-app where user can register, log in, log out in authentication processes with 'firebase', as well as see the details of the movies and watch the trailers of those who are logged in. After registering with TMDB, the application was created by getting data for searching movies and movie details and getting API key. Styles are given using Bootstrap css framework. Skills/Tools : React-router library, Bootstrap library, Axios library and Firebase
- **Recipe App**: Here is a recipe application, React Hooks, Rest APIs and Style Components were used. There is a Search section for registered users and they can search for the recipe who want with its content. In addition, the React Router System was used in the header section. APIs were getting from EDEMAM.
- **Task Tracker App**: Functional React project and used Hooks. It is a project user can add any task, remove whichever you want or selected completed any task. Also it has a button to show or hide tasks.
- **Movie Booking App**: An application has been designed that allows users to choose the seats they want and at the same time keeps the total price up to date on the screen according to the prices of the films in the vision. Skills/Tools : Json, Local Storage and Array Methods.
- **Weather Condition App** : Project aims to display current weather condition of searched city around the world with fetching Weather Api data. Skills/Tools : Async await methods.
- **Checkout Page** : Our goal was to develop a real e-commerce website's checkout page for that project. There is a cart for buying products, and we can increase or decrease the number of products. By changing a parameter in the cart, our js functions calculate the cart total price. DOM, iterator, callback functions,

string-array functions and events are used in our page. Additionally, we can remove products from the cart by clicking the remove button and decreasing the amount to "0". In that case, our page asks us to delete the product from the cart. As soon as you confirm the deletion, the sour chart total is recalculated by the js functions. Skills/Tools : DOM, Iterator, Callback functions, String-array functions and Events.

- **Check Daily Routine** : In this project, a simple To-Do application was made using the array structure. User can add task from browser, mark tasks as completed and delete them. Completed/total number of tasks can be displayed with a counter. It is a project created with HTML-CSS-Javascript using a responsive design so that users can keep their daily routines under control and enter a more quality life cycle. Skills/Tools : JS Dom Manipulation and Event Listeners.
- **IOS Calculator**: In this project, the goal is to make a functional and visual clone of the calculator of an iOS device. Skills/Tools : HTML, CSS Frameworks, JS Dom Manipulation and Event Listeners.
- **Delux Hotel Site Project**: It is a hotel project made with care to be responsive. The styles in the system are made with flex layout from the original css styles without using any framework. Skills/Tools : HTML, CSS, responsive web design.
- **Parallax Web Site**: Parallax scrolling is a web site trend where the background content (i.e. an image) is moved at a different speed than the foreground content while scrolling. Skills/Tools : HTML, CSS .
- **Sass Project** : In this project, portfolio website is designed using HTML and SASS (SCSS) codes for style. In this Sass/SCSS project, I structured a project into separate files and folders. Skills/Tools : HTML, Sass/SCSS
- **Country Main Info Project**: The goal of this project is to make an api request from [restcountries](#) and to display the desired data about the countries. Skills/Tools : Async, Await and Fetch.
